healthcare *Clinical Communication in Medicine* Jo Brown, Lorraine Noble, Alexia Papageorgiou, Jane Kidd, 2015-11-02 Highly Commended at the British Medical Association Book Awards 2016 *Clinical Communication in Medicine* brings together the theories, models and evidence that underpin effective healthcare communication in one accessible volume. Endorsed and developed by members of the UK Council of Clinical Communication in Undergraduate Medical Education, it traces the subject to its primary disciplinary origins, looking at how it is practised, taught and learned today, as well as considering future directions. Focusing on three key areas: the doctor-patient relationship, core components of clinical communication, and effective teaching and assessment, *Clinical Communication in Medicine* enhances the understanding of effective communication. It links theory to teaching, so principles and practice are clearly understood. *Clinical Communication in Medicine* is a new and definitive guide for professionals involved in the education of medical undergraduate students and postgraduate trainees, as well as experienced and junior clinicians, researchers, teachers, students, and policy makers. **Why Hospitals Fail** Prasad Godbole, Derek Burke, Jill Aylott, 2017-06-28 This book explores the current wider political, social and economic context of hospitals in the public and private sector globally, and identifies the push and pull tension between the demands of the quality regulator and the requirements of health care commissioning processes. This book draws on the evidence of what works to improve the quality of hospital services in the development of medical and clinical leadership models. The book seeks to develop a specific paradigm shift in understanding the development of medical leaders by promoting a culture of engagement through participation, and one that is defined by the experiences of medical leaders. The editors examine new and emergent models of leadership and their contribution to explain effective and sustainable change, and suggest that theoretical models of leadership are often unable to explain many of the practice-led challenges presented in hospitals. It will be useful reading for specialists seeking to develop their own learning as a leader, and who identify their learning needs. Intercultural Crisis Communication Christophe Declercq, Federico M. Federici, 2019-11-14 *Intercultural Crisis Communication* poses pertinent questions and provides powerful responses to crises that have characterised the modern world since 2010. Language mediation in situations of disaster, emergency and conflict is an underdeveloped area of scholarship in Translation Studies. This book responds to a clear need for research drawn from practical experiences in the field and explores the crucial role of translation, interpretation and mediation in contexts of crises. Particular consideration is given to situations where rare or minority languages represent a substantial obstacle to humanitarian operations. Contemporary case studies from the USA, Africa, Europe and Armenia provide major examples of crisis communication that call for more efficient language mediation. Such examples include Syrian displacement, the refugee crisis in Croatia and Italy, international terrorism, and national public administration interpreting in conflict, and for *M decins sans Frontières*, as well as the integration of refugee doctors for employment in the UK. With contributions from experts in the field, this volume is of international relevance and provides a multifaceted overview of intercultural communication issues and remedies during

crises Forthcoming Books Rose Arny,2003-04 *Oxford Textbook of Medical Education* Kieran Walsh,2016 Providing a comprehensive and evidence based reference guide for those who have a strong and scholarly interest in medical education the Oxford Textbook of Medical Education contains everything the medical educator needs to know in order to deliver the knowledge skills and behaviour that doctors need The book explicitly states what constitutes best practice and gives an account of the evidence base that corroborates this Describing the theoretical educational principles that lay the foundations of best practice in medical education the book gives readers a through grounding in all aspects of this discipline Contributors to this book come from a variety of different backgrounds disciplines and continents producing a book that is truly original and international Guide to Literature of Home and Family Life Annie Robertson Dyer,1924 *Computational Radiomics for Cancer Characterization* Omar Sultan Al-Kadi,Xujiong Ye,Giorgio Russo,Joseph Ross Mitchell,2022-10-21 **Medication Safety and Interventions to Reduce Patient Harm in Low- and Middle-Income Countries** Mansour Adam Mahmoud,Brian Godman,Ahmed Awaisu,Ahmed Ibrahim Fathelrahman,Hisham Aljadhey,Joseph O.
