Documenting Individual Identity The Development Of State Practices In The Modern World:

Documenting Individual Identity Jane Caplan, John Torpey, 2001-12-09 Publisher Description Reading Faces Edward Higgs, 2025-10-20 Reading Faces is the first book to discuss the historical contexts and theoretical underpinnings of the artificial intelligence AI systems that identify individuals or purport to ascribe emotions and characteristics to them based on their facial features It examines the direct impact of past research on the development of AI systems the way in which the past provides contexts which have predisposed people to accept outputs of AI systems as common sense how the role of politics and the changing nature of the state have led to the introduction of AI systems and their precursors how previous technologies led to the acceptance of the introduction of superficially similar AIs and how the outputs and biases such as purported associations between race and criminality of facial biometrics systems have been determined by the historical nature of the underlying datasets they analyze Reading Faces approaches these issues within the sweep of Western History how it has shaped conceptual categories about the application and ethics of AI and tried to foist those ideas and values on the Global South This book is essential reading for postgraduates scholars as well as non specialist readers such as booksellers and librarians interested in modern AI technology **Identifying the English** Edward Higgs, 2011-10-06 Personal identification is very much a live political issue in Britain and this book looks at why this is the case and why paradoxically the theft of identity has become ever more common as the means of identification have multiplied Identifying the English looks not only at how criminals have been identified branding fingerprinting DNA but also at the identification of the individual with seals and signatures of the citizen by means of passports and ID cards and of the corpse Beginning his history in the medieval period Edward Higgs reveals how it was not the Industrial Revolution that brought the most radical changes in identification techniques as many have assumed but rather the changing nature of the State and commerce and their relationship with citizens and customers In the twentieth century the very different historical techniques have converged on the holding of information on databases and increasingly on biometrics and the multiplication of these external databases outside the control of individuals has continued to undermine personal identity security **Rhythm and Vigilance** Vita Peacock, Mikkel Kenne Bruun, Claire Elisabeth Dungey, Matan Shapiro, 2025-05-16 Available open access digitally under CC BY NC ND licence Studies of surveillance have emphasised how technology is used to control space This innovative collection examines how new monitoring technologies are also affecting the experience of time Drawing on Henri Lefebvre's concept of rhythm the book brings together ethnographic research from Europe China and the US to show how digital monitoring is transforming spatio temporal relations across the Global North As digital technologies continue to reshape the rhythms of life this book makes a valuable contribution to both anthropology and surveillance studies **Seeking Security** G R Sullivan, Ian Dennis, 2012-04-13 Many academic criminal lawyers and criminal law theorists seek to resolve the optimum conditions for a criminal law fit to serve a liberal democracy Typical wish lists include a criminal law that intervenes against

any given individual only when there is a reasonable suspicion that s he has caused harm to the legally protected interests of another or was on the brink of doing so Until there is conduct that gives rise to a reasonable suspicion of criminal conduct by an individual s he should be allowed to go about his or her business free from covert surveillance or other forms of intrusion All elements of crimes should be proved beyond any reasonable doubt Any punishment should be proportionate to the gravity of the wrongdoing and when the offender has served this punishment the account should be cleared and good standing recovered Seeking Security explores the gap between the normative aspirations of liberal criminal law scholarship and the current criminal law and practice of Anglophone jurisdictions The concern with security and risk which in large part explains the disconnection between theory and practice seems set to stay and is a major challenge to the form and relevance of a large part of criminal law scholarship *The American Journal of Sociology*, 2003 **Accounting For Horror** Nigel Eltringham, 2004-01-20 The is the first book to explore how the events of 1994 have been interpreted within in the politics of post genocide Rwanda The President's Annual Report European University Institute, 1999 **Children of Fate** Nara B.
