## **Fixing Fuel Poverty Fixing Fuel Poverty:**

*Fixing Fuel Poverty* Brenda Boardman, 2013-05-13 Since its publication in the early 90s Brenda Boardman's *Fuel Poverty* has been the reference text for those wishing to learn about this complex subject. In this its successor she turns a critical eye to the new millennium and finds that the situation while now more widely recognised is far from having improved. The book begins by discussing the political awakening to the issue and exploring just who constitutes the fuel poor. It examines the factors that contribute to fuel poverty: low incomes, high fuel prices and poor quality housing, and looks at and evaluates the policies that have been employed to help reduce the problem. The latter part presents a detailed set of proposals based around long term improvements in the housing stock that must be employed if we are to avoid a dire situation continuing to get worse. Based on detailed analysis of the situation in the UK, the growth of fuel poverty, sometimes called energy poverty in other countries, and the new focus in European policy makes the book timely and provides important lessons for those who now have to produce policies to tackle the issues.

**Power and Politics in Sustainable Consumption Research and Practice** Cindy Isenhour, Mari Martiskainen, Lucie Middlemiss, 2019-03-04 With growing awareness of environmental deterioration, atmospheric pollution and resource depletion, the last several decades have brought increased attention and scrutiny to global consumption levels. However, there are significant and well documented limitations associated with current efforts to encourage more sustainable consumption patterns, ranging from informational and time constraints to the highly individualizing effect of market based participation. This volume, featuring essays solicited from experts engaged in sustainable consumption research from around the world, presents empirical and theoretical illustrations of the various means through which politics and power influence unsustainable consumption practices, policies and perspectives. With chapters on compelling topics including collective action, behaviour change and the transition movement, the authors discuss why current efforts have largely failed to meet environmental targets and explore promising directions for research, policy and practice. Featuring contributions that will help the reader open up politics and power in ways that are accessible and productive, and bridge the gaps with current approaches to sustainable consumption, this book will be of great interest to students and scholars of sustainable consumption and the politics of sustainability.

**Law and the Precarious Home** Helen Carr, Brendan Edgeworth, Caroline Hunter, 2018-05-17 This book explores the emergent and internationally widespread phenomenon of precariousness specifically in relation to the home. It maps the complex reality of the insecure home by examining the many ways in which precariousness is manifested in legal and social change across a number of otherwise very different jurisdictions. By applying innovative work done by socio-legal scholars in other fields such as labour law and welfare law to the home, *Law and the Precarious Home* offers a broader theoretical understanding of contemporary precarisation of law and society. It will enable reflections upon differential experience of home dependent upon class, race and gender from a range of local, national and cross-national perspectives. Finally, it will explore the pluralisation of ideas of home.

in subjective experience social reality and legal form The answers offered in this book reflect the expertise and standing of the assembled authors who are international leaders in their field with decades of first hand practical and intellectual engagement with the area      **Handbook on the Geographies of Energy** Barry D. Solomon, Kirby E. Calvert, 2017-12-29

**Demographic Change and the Environment** Great Britain. Royal Commission on Environmental Pollution, 2011 In Demographic Change And The Environment the Royal Commission on Environmental Pollution analyses demographic trends in the UK and their potential environmental impacts Apart from total numbers of people it is also important to consider other demographic trends such as changes in the age structure growth in the number of households and where people live and work These demographic trends have environmental impacts through the demand for water The generation of waste air quality greenhouse gas emissions and changes in biodiversity Government has not given adequate attention To The implications of demographic change For The environment Unless the issues are addressed urgently there is substantial risk of costly problems emerging in the next 40 years More important than total population size are factors such as household size The age structure of the population and where people live Public policy can have very limited direct effects on these demographic factors with the exception of where people live Patterns of consumption have a greater impact on the environment than demographic factors There is far greater scope to influence consumption patterns and their impact A step change is needed in efforts to increase resource use efficiency The demand for new housing and related development as a result of demographic change will increasingly come up against environmental constraints in some parts of the country The

constraints can be managed but at a significant economic and environmental cost The government should compare these costs with the cost of enhanced incentives to encourage development in areas facing fewer constraints **Promoting Energy Efficiency Investments** International Energy Agency,2008 Existing buildings are responsible for over 40% of the worlds total primary energy consumption An impressive amount of energy could be saved simply by applying energy efficient technologies Yet various market barriers inhibit energy efficiency improvements in existing buildings and result in energy savings that are significantly lower than potentials This publication provides illustrations of policies and measures implemented in five IEA member countries and the European Union Each case includes relevant background and contextual information as well as a detailed evaluation of each policy according to five pre defined criteria relevance effectiveness flexibility clarity and sustainability *Housing, the Environment, and Our Changing Climate* Christoph Sinn,John Perry,2008 The climate is changing and this book aims to capture both ways in which this is true First the global warming which is taking place as our atmosphere is forced to absorb ever more man made carbon dioxide is now an indisputable reality It is not too late to prevent the worst effects of such climate change but in any event it will have a profound impact on the way we live and the kinds of houses we need Second the climate is changing albeit slowly in terms of the response by the housing world to the challenge of global warming Government has instigated a radical approach to environmental standards for new housing but has arguably been slower to realise the urgency of action to tackle poor environmental standards in the existing housing stock This completely new version of the earlier book *Housing and the Environment* A new agenda concentrates on the linked issues of climate change fuel shortages and fuel poverty **Energy Trends** ,2011 *The U.
