E-commerce Platform Acceptance Ewelina Lacka, Hing Kai Chan, Nick Yip, 2014-06-02 This book aims to offer a comprehensive overview of the issues facing organizations when deciding whether to accept e commerce as a platform for business It provides a detailed evaluation of how the implementation of e commerce may affect all parties within the supply chain suppliers retailers and consumers It also compares various opportunities and threats of accepting e commerce in order to conclude whether it might offer access to a new digital era or whether it is an uncertain option yielding potential pitfalls This book helps to reveal existing and future consequences of e commerce acceptance which are crucial for business decisions and operations in the present and going forward It therefore provides a unique insight into emerging e commerce platform acceptance and is one of the first to provide a holistic perspective of how each party in the supply chain is affected by e commerce acceptance E commerce is bringing into view more flexible effective and efficient ways of conducting business activities among suppliers retailers and consumers It is not limited to time and space and therefore this digital platform has already established for itself a major role in today s world economy Despite promised benefits however threats emerge which need to be faced when turning to the

virtual marketplace all of which have to be acknowledged before businesses will shift and adapt to the e commerce platform This book is intended for postgraduate students executive MBA students and researchers interested in information management marketing and operations management **The Economist** ,1924 Cross-Border E-Commerce Marketing and Management Hoque, Md. Rakibul,Bashaw, R. Edward,2020-10-30 The continued advancement of globalization increases in internet connectivity compatibility of international payment systems and adaptability of logistics and shipping processes have combined to contribute to the rapid growth of the cross border e commerce market Due to these advancements and the ubiquitous presence of smartphones consumer use of cross border e commerce is increasingly simplified and thus sellers are hardly restricted to a specific country in terms of promoting selling and shipping goods worldwide The burgeoning opportunities habits and trends of shopping on cross border e commerce platforms have expedited the prospect of becoming a presence in the global market This is true for enterprises of all sizes especially for small and medium sized enterprises SMEs that want to add their footprint in the international market for the first time Like any other industry cross border e commerce has its specific economics and driving forces but has different scopes challenges and trends due to the geographic and cultural expanse of relevant environments Cross Border E Commerce Marketing and Management was conceptualized by identifying the scope of new complementary information with a comprehensive understanding of the issues and potential of cross border e commerce businesses The authors believe that this book will not only fill the void in the current research but will also provide far sighted vision and strategies as it covers big data artificial intelligence IoT supply chain management and more This book provides the necessary knowledge to managers to compete with the competitive market structure and ultimately contribute to the sustainable economic growth of a country It works as a guideline for existing cross border e commerce managers to formulate individual strategies that combine to optimize the industry while keeping the enterprise competitive This book is useful in both developed and developing country contexts This publication is an ideal resource for academicians policy makers stakeholders and cross border e commerce managers especially from SMEs *Information and Communications Technology and Operational Efficiency in Supermarkets in Nairobi* Josephat Mwebi,2018-09-26 Thesis M A from the year 2013 in the subject Business economics Miscellaneous grade 87% 1st University of Nairobi Management Science course Operations Management language English abstract The aim of this research was to find out the role of various ICT applications in the improvement of operational efficiency for supermarkets in Nairobi It aimed to answer the questions of ICT applications that are adopted by supermarkets in Nairobi and the relationship between the level of adoption of these applications and operational efficiency that was attained A sample of 58 supermarkets was chosen from the list of 110 supermarkets to which structured questionnaires were issued by drop and pick method The forty two questionnaires were duly filled and returned This constitutes 72 4% response which according to Stacks 2011 was adequate for use in analysing and presenting findings for the identified research objectives The findings indicated that applications that were

simple and cheap to install and implement such as CCTV cameras electronic point of sale systems and bar code readers were most prevalent while advanced and relatively expensive ICT applications such as ecommerce supply chain systems and enterprise resource systems were least used The size of supermarkets also determined ICT equipment that were used Coefficient of correlation of 0.52 was obtained from the regression analysis that measured the strength of the relationship between dependent and independent variables The relationship was direct meaning that supermarkets with largest extent of ICT application in their premises had the highest operational efficiency It was recommended that supermarket owners acquaint themselves with ICT applications that are available in the market and evaluate those that are suitable for their needs Supermarkets that had a wide array of application in their premises had high operational efficiency It is therefore necessary that they use all available ICT applications depending on their needs Given that some ICT applications were expensive to buy and implement it was suggested that developers make applications that are suitable for local needs with regard to supermarkets

Application Models for E-commerce Zinovy Radovilsky, 2015 E commerce is mushrooming in both business to business and business to consumer sectors It shakes the foundation of most industries leads to entirely new kinds of businesses and directly affects both our careers and the way we live One of the most significant changes is the manner in which companies conduct business Specifically how they manage their resources connect and communicate with customers and negotiate and outsource from suppliers Provides a detailed description and analysis of e commerce business models including their components classification and performance results This book also presents managerial aspects of various up to date e commerce models

Internet Retail Operations Timothy M. Laseter, Elliot Rabinovich, 2011-07-19 The rise of the Internet as the first choice for retail shoppers presents new challenges for retailers and suppliers This book details how information technology evolved to play such a role in retail supply chain networks how this has impacted supply chain networks and how this has changed service operations The first part of the text addresses information technology in relation to service and retail industries The second part covers how the new supply chain dynamics impacts traditional service and retail delivery the costs involved the impacts on customer service and customer expectations The third part presents case studies of how different retailers meet challenges
