Moral Systems and the Evolution of Human Rights Bruce K. Friesen, 2014-10-27

This volume offers a comprehensible account of the development and evolution of moral systems It seeks to answer the following questions If morals are eternal and unchanging why have the world's dominant religious moral systems been around for no more than a mere six thousand of the two hundred thousand years of modern human existence What explains the many and varied moral systems across the globe today How can we account for the significant change in moral values in one place in less than 100 years time Using examples from classical civilizations the book demonstrates how increasing diversity compromises a moral system's ability to account for and integrate larger populations into a single social unit This environmental stress is not relieved until a broader more abstract moral system is adopted by a social system This new system provides a sense of belonging and purpose for more people motivating them to engage in prosocial or moral acts and refrain from socially disruptive selfish acts The current human rights paradigm is the world's first universal indigenous moral system Because moral systems can be expected to continue to evolve this book points to current boundaries of the human rights paradigm and where the next major moral revolution might emerge

Storytelling for Sustainability in Higher Education Petra Molthan-Hill, Heather Luna, Tony Wall, Helen Puntha, Denise Baden, 2020-03-25 To be a storyteller is an

incredible position from which to influence hearts and minds and each one of us has the capacity to utilise storytelling for a sustainable future This book offers unique and powerful insights into how stories and storytelling can be utilised within higher education to support sustainability literacy Stories can shape our perspective of the world around us and how we interact with it and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted The craft of storytelling is as old as time and has influenced human experience throughout the ages The conscious use of storytelling in higher education is likewise not new although less prevalent in certain academic disciplines what this book offers is the opportunity to delve into the concept of storytelling as an educational tool regardless of and beyond the boundaries of subject area Written by academics and storytellers the book is based on the authors own experiences of using stories within teaching from a story of the Ecology of Law to the exploration of sustainability in accounting and finance via contemporary cinema Practical advice in each chapter ensures that ideas may be put into practice with ease In addition to examples from the classroom the book also explores wider uses of storytelling for communication and sense making and ways of assessing student storytelling work It also offers fascinating research insights for example in addressing the question of whether positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories Everyone working as an educator should find some inspiration here for their own practice on using storytelling and stories to co design positive futures together with our students
