Generation R Generation R:

A Gen-R Journey David Wallin, 2019-10-02 The primary intention of *A Gen R Journey* is to bring to light the ongoing unfolding eternal walk of the author who is just one of today's disciples of Yeshua Ha Mashiach also called Jesus Christ. The changing tone, the evolving subject matter and the developing writing style captured in sequential Bible messages reflect the author's spiritual growth between 2011 and 2017. By detecting the author's growth through these messages, the reader may find his or her own benchmarks in their Gen R journey. Hopefully *A Gen R Journey* will inspire non-believers to become believers, believers to become disciples, and disciples to fulfill all the plans God has for each of us and become the salt and light we are created to be. As the reader journeys from one message to the next, it is my prayer that light would be shed on the growth of your relationship with the Father, the Son, and the Holy Spirit regardless of whether you are old or young in age or old or new in the faith. If you are a scoffer, may your eyes be opened. If you are already a believer, do not settle for salvation. If you are a disciple, do not just be a hearer of the Word but a doer. Do not settle for just being a doer but come into full agreement with the Father through His Word. Jesus said, "Greater works than these you shall do." Are you doing greater works than He did? Have you fulfilled all the plans He has for you? *A Gen R Journey* should inspire each of us to take the next step in our walk into the immeasurable glorious Kingdom of God.

Assessing Schools for Generation R (Responsibility) Michael P. Mueller, Deborah J. Tippins, Arthur J. Stewart, 2013-07-17 Today's youth will face global environmental changes as well as complex personal and social challenges. To address these issues, this collection of essays provides vital insights on how science education can be designed to better engage students and help them solve important problems in the world around them. *Assessing Schools for Generation R: Responsibility* includes theories, research, and practices for envisioning how science and environmental education can promote personal, social, and civic responsibility. It brings together inspiring stories, creative practices, and theoretical work to make the case that science education can be reformed so that students learn to meaningfully apply the concepts they learn in science classes across America and grow into civically engaged citizens. The book calls for a curriculum that equips students with the knowledge, skills, attitudes, and values to confront the complex and often ill-defined socioscientific issues of daily life. The authors are all experienced educators and top experts in the fields of science and environmental education, ecology, experiential education, educational philosophy, policy, and history. They examine what has to happen in the domains of teacher preparation and public education to effect a transition of the youth of America. This exciting, informative, sophisticated, and sometimes provocative book will stimulate much debate about the future direction of science education in America and the rest of the world. It is ideal reading for all school superintendents, deans, faculty, and policymakers looking for a way to implement a curriculum that helps build students into responsible and engaged citizens.
