Geography Discipline Profession And Subject Since 1870 An International Survey Geojournal Library:

2001 Massimo Mastrogregori, 2011-08-02 Annually published since 1930 the International bibliography of Historical Sciences IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times The works are arranged systematically according to period region or historical discipline and within this classification alphabetically The bibliography contains a geographical index and indexes of persons and authors *Geography: Discipline, Profession and Subject since 1870* Gary S. Dunbar, 2013-03-14 Gary S Dunbar Professionalization of geography I do not think I like that word I am quite certain I do not like that word I said A F Martin of Oxford University in 1980 when I mentioned to him that I was making a study of the professionalization of geography in Europe and North America from about 1870 to 1930 I should not have been surprised by his reply because Mr Martin a highly regarded lecturer tutor and university man was in some ways a typical example of his generation of British geographers in that he did not have an advanced degree and his publication record was meager Except for a single remarkable essay Martin 1951 he was not well known in the field of geography at least not outside the United Kingdom Was he then a professional geographer Yes indeed because he was a full time scholar in a distinguished university even though he lacked the sort of credentials that have been demanded of subsequent generations of scholars at Oxford and elsewhere I certainly do not mean to denigrate Martin or his ilk I am simply using this anecdote to launch a book on the emergence of modern geography **Cross-Curricular Teaching in the Primary School** Trevor Kerry, 2015-02-11 How can teaching across the curriculum improve children's learning How can you plan meaningful imaginative topic work Cross Curricular Teaching in the Primary School helps teachers plan a more imaginative integrated curriculum by presenting in accessible language a rationale and framework for teaching across the subjects This second edition has been fully updated in light of the new curriculum and shows how cross curricular work can contribute to deeper subject knowledge Illustrated throughout with examples of effective topic work in successful schools this book provides guidance on the underpinning theory and strategies to facilitate cross curricular work with young children With a new structure to emphasise the importance of careful planning and preparation issues covered include How children learn The theory and rationale behind the cross curricular approach Developing the curriculum and lesson planning Teaching and learning in an integrated way at KS1 and KS2 Cross curricular approaches for maths Whole school approaches and team teaching for cross curricular teaching The role of support staff in cross curricular teaching Improving children's thinking skills Supporting children with special needs Using new media and drama to facilitate cross curricular learning Assessing cross curricular learning Cross Curricular Teaching in the Primary School provides much needed support for busy student and practising teachers Packed with practical ideas it offers an accessible guide to all aspects of introducing an integrated curriculum **Cities between Competitiveness and Cohesion** Peter Ache, Hans Thor Andersen, Thomas Maloutas, Mike

Raco,Tuna Taşan-Kok,2008-04-29 This book offers a cross European analysis of urban and regional strategies of reconciling welfare and competitiveness It develops an understanding of the strategy challenge to reconcile competitiveness with cohesion and provides an analysis of cities and regions as actors in multi level governance settings The book offers a European comparative view on housing labour markets enterprises ethnical issues gender dimensions urban development projects transport and sustainability **Solid Waste Management and Recycling** Isa Baud,Johan Post,Christine

Furedy,2006-04-11 This book is for practising professionals and academics working in urban planning and international development international project staff trainers urban development researchers and teaching staff in universities and polytechnics Solid Waste Management and Recycling is unique in that it utilizes an integrated solid waste management perspective in its analysis provides embedded case study data deals with both formal and informal actors and institutional arrangements in solid waste management and recycling has chapters written by experts from the countries concerned Kenya and India can be used in graduate level courses in urban development urban management and planning and technical engineering courses for students project staff and technical students **Dynamic Trip Modelling** Robert G.V.

Baker,2006-08-05 The thesis of this book is that there are one set of equations that can define any trip between an origin and destination The idea originally came from work that I did when applying the hydrodynamic analogy to study congested traffic flows in 1981 However I was disappointed to find out that much of the mathematical work had already been done decades earlier When I looked for a new application I realised that shopping centre demand could be like a longitudinal wave governed by centre opening and closing times Further a solution to the differential equation was the gravity model and this suggested that time was somehow part of distance decay This was published in 1985 and represented a different approach to spatial interaction modelling The next step was to translate the abstract theory into something that could be tested empirically To this end I am grateful to my Ph D supervisor Professor Barry Garner who taught me that it is not sufficient just to have a theoretical model This book is an outcome of this on going quest to look at how the evolution of the model performs against real world data This is a far more difficult process than numerical simulations but the results have been more valuable to policy formulation and closer to what I think is spatial science The testing and application of the model required the compilation of shopping centre surveys and an Internet data set **Historical Geography** ,2004 *The Post-Socialist*

City Kiril Stanilov,2007-08-13 In the large body of literature produced during the last fifteen years on the transformation of Eastern European societies after the fall of communism studies investigating changes in urban form and structure have been quite rare Yet a profound reorganization of the manner in which urban space is appropriated has taken place impacting the life of over 200 million urban residents in the region The patterns of spatial organization which have been established during this fairly limited but critical timeframe are likely to set the direction of future urban development in CEE cities for a long time This book focuses on the spatial transformations in the most dynamically evolving urban areas of post socialist Central

and Eastern Europe linking the restructuring of the built environment with the underlying processes and forces of socio economic reforms We hope that the detailed accounts of the spatial transformations in a key moment of urban history in the region will enhance our understanding of the linkages between society and space adding to the knowledge that is needed for resolving the difficult challenges facing cities throughout the globe in the beginning of the twenty first century [Current Geographical Publications](#) University of Wisconsin--Milwaukee.
