Geographies of Knowledge and Power Peter Meusburger, Derek Gregory, Laura Suarsana, 2015-06-24 Interest in relations between knowledge power and space has a long tradition in a range of disciplines but it was reinvigorated in the last two decades through critical engagement with Foucault and Gramsci This volume focuses on relations between knowledge and power It shows why space is fundamental in any exercise of power and explains which roles various types of knowledge play in the acquisition support and legitimization of power Topics include the control and manipulation of knowledge through centers of power in historical contexts the geopolitics of knowledge about world politics media control in twentieth century cartography in modern war the power of words the changing face of Islamic authority and the role of Millennialism in the United States This book offers insights from disciplines such as geography anthropology scientific theology Assyriology and communication science

Explorations in Critical Human Geography Derek Gregory, 1998

Race, Place, and the Law, 1836-1948 David Delaney, 1998 Black and white Americans have occupied separate spaces since the days of the big house and the quarters But the segregation and

racialization of American society was not a natural phenomenon that just happened The decisions enacted into laws that kept the races apart and restricted blacks to less desirable places sprang from legal reasoning which argued that segregated spaces were right reasonable and preferable to other arrangements In this book David Delaney explores the historical intersections of race place and the law Drawing on court cases spanning more than a century he examines the moves and countermoves of attorneys and judges who participated in the geopolitics of slavery and emancipation in the development of Jim Crow segregation which effectively created apartheid laws in many cities and in debates over the doctrine of changed conditions which challenged the legality of restrictive covenants and private contracts designed to exclude people of color from white neighborhoods This historical investigation yields new insights into the patterns of segregation that persist in American society today

Space, Knowledge and Power Jeremy W Crampton, Stuart Elden, 2007 Social Sciences Research Journal ,2016 Elements of Useful Knowledge, Vol.I. Noah Webster, 1815 **Geography and Identity** Dennis Crow, 1996 **Mapping and Historiography in Contemporary Canadian Literature in English** Nicola Renger, 2005

This study focuses on the way in which Canadian novels of the 1980s and 1990s use mapping and historiography as themes metaphors and narrative models While John Steffler s *The Afterlife of George Cartwright* reveals the past influence of colonial ideology on mapping and historiography and its lasting effects Daphne Marlatt s *Ana* Historic challenges patriarchal mappings and historiographies In *In the Skin of a Lion* Michael Ondaatje portrays Canada in the early twentieth century as a capitalist society determined by colonial attitudes Ondaatje s *The English Patient* illustrates the difficulty of defining an individual or communal identity in the postcolonial age of globalisation The analysis of these representative novels is complemented by references to further Canadian works which reveal that Canadian literature mirrors and promotes current debates on the construction of reality and on multicultural and global identities *Prolegomena to an Idealist Theory of Knowledge* Norman Kemp Smith, 1924 **The Journal of school geography** ,1897 *Human Geography* Derek Gregory, Ron Martin, Graham Smith, 1994 Aimed at a broad student readership this book focuses on developments in social scientific theory of particular significance in rethinking human geography and on the contribution the geographical imagination can make to good social science **Geographies of Judgment** David P. Delaney, 1995 *The Dictionary of Human Geography* Derek Gregory, 2009 The Dictionary of Human Geography continues to be the one guidebook no student instructor or researcher in the field can afford to be without

BOOK JACKET **Key Methods in Geography** Nicholas Clifford, Gill Valentine, 2003-06-06 Key Methods in Geography is an introduction for undergraduates to the principal methodological issues involved in the collection analysis and presentation of geographical information It provides an accessible primer which will be used by students as a reference throughout their degree on all issues from research design to presentation A unique feature of the book is that it provides definitions of terms from both human geography and physical geography Organized into four parts Getting Started in Geographical Research Data Collection in Human Geography Data

Collection in Physical Geography Analyzing and Representing Geographical Data Each chapter is comprised of a short definition a summary of the principal arguments a substantive 5 000 word discussion the use of real life examples and annotated notes for further reading The teaching of research methods is integral in all geography courses Key Methods in Geography identifies the key analytical and observational strategies with which all geography undergraduates should be conversant

Environment and Planning ,2008 *Subjectivities, Knowledges, and Feminist Geographies* Liz Bondi,2002-07-31 Research about people always makes assumptions about the nature of humans as subjects This collaboration by a group of feminist researchers looks at subjectivity in relation to researchers the researched and audiences as well as at the connections between subjectivity and knowledge The authors argue that subjectivity is spatialized in embodied multiple and fractured ways challenging the dominant notions of the rational bounded subject A highly original contribution to feminist geography this book is equally relevant to social science debates about using qualitative methodologies and to ongoing discussions on the ethics of social research

Circles of Dignity James R. Cochrane,1999 Deeply challenging to the religious and social status quo this work searches for a new understanding of religion s role in our time of massive social economic and geopolitical change Guide by his remarkable experience with South African indigenous groups and popular religion the author shows how marginalized people read the Bible and how their local wisdom or incipient theologies offers new perspectives on power tradition and God as well as new notions of ministry Church and religion s role in the public sphere Leveraging the insights at the margin to displace the centre this work is a blueprint for a socially transformative theology
